

# 2026 GLOBAL MBA RANKINGS

The 2026 Global MBA Rankings profile 340 programmes across 24 countries. Each table is weighted against defined performance criteria, including faculty quality, diversity, accreditation, cohort composition, exposure and value measures. The objective is not to reward reputation alone, but to provide a consistent reference point across varied institutional models.

Read together, the tables offer perspective, helping potential students assess fit, format and long-term alignment rather than position alone.
